TABLES DERIVED

Strong favourites (70%+)

No game today has a side at 70% or better with enough games played behind it.

Most goals expected

Highest projected combined goals, from the two sides' scoring and conceding rates.

How to read this

1 / X / 2
Home win, draw, away win. The bar is drawn to scale.

goals
Projected combined goals for the match.

score
Projected goals, home-away.

over 2.5
Chance of three or more goals.

btts
Chance both teams score.

under 1.5
Chance of nought or one goal in total.

W D L
Last five results, most recent first, with goals for and against across them.

dots
How much rests on these teams' own results: three dots = 5+ games each, none = league baseline.

What is behind these numbers

League tables are derived by replaying past days of results, because the feed exposes no standings endpoint. A league early in its season, or newly added, will show few games played and its numbers lean on the league average instead.

Line-ups, injuries and suspensions are not in this model — the feed does not carry them.
