Strong favourites (70%+)

One side at or above the threshold, on at least some real results. A call built purely on the league baseline is an artefact of the prior, not a read on the game.

How to read this

1 / X / 2	Home win, draw, away win. The bar is drawn to scale.
goals	Projected combined goals for the match.
score	Projected goals, home–away.
over 2.5	Chance of three or more goals.
btts	Chance both teams score.
under 1.5	Chance of nought or one goal in total.
W D L	Last five results, most recent first, with goals for and against across them.
dots	How much rests on these teams' own results: three dots = 5+ games each, none = league baseline.

What is behind these numbers

League tables are derived by replaying past days of results, because the feed exposes no standings endpoint. A league early in its season, or newly added, will show few games played and its numbers lean on the league average instead.

Line-ups, injuries and suspensions are not in this model — the feed does not carry them.
