34
COMPETITIONS

532
TABLES DERIVED

Strong favourites (70%+)

One side at or above the threshold, on at least some real results. A call built purely on the league baseline is an artefact of the prior, not a read on the game.

How to read this

1 / X / 2 Home win, draw, away win. The bar is drawn to scale.

goals Projected combined goals for the match.

score Projected goals, home-away.

over 2.5 Chance of three or more goals.

btts Chance both teams score.

under 1.5 Chance of nought or one goal in total.

W D L Last five results, most recent first, with goals for and against across them.

dots How much rests on these teams' own results: three dots = 5+ games each, none = league baseline.

What is behind these numbers

League tables are derived by replaying past days of results, because the feed exposes no standings endpoint. A league early in its season, or newly added, will show few games played and its numbers lean on the league average instead.

Line-ups, injuries and suspensions are not in this model — the feed does not carry them.
